Star Power

Star Power is an exciting game of chance that can be played just for fun or to give away prizes. It can be run as its own promotion as an element of our *Gigantic Game Show Give Away.*

Players: 1—4

Game Board: Any even number between 4 and 24 "Stars" containing a standard value (5-200 points) or customized values. Values are "hidden" behind a "star".

Game Play: The computer selects a starting player. Each player starts the game "banking" a star. This star is put away and it's value kept secret until the end of the game.

Players then alternate opening stars. Each value of the star is added to their score. In some cases, some stars may have a double bonus value or a "hole". If a player opens a black hole star, the value of that star is subtracted from their score. This process repeats until all of the stars are opened. Players can be given an option to "play" or "pass" upon each star. The excitement builds as points are added or taken away from the players, all with out of this world graphics and sounds Once all of the stars are revealed we show the stars from the bank; this can change everything! Prizes can be given for the most points or actual value players achieve.

Players scores can be displayed on our standard 3 digit or 4 digit podiums if there is room on the stage or just displayed on a screen.

Game Play Time: With 24 stars, each round lasts about 15 minutes.

Customization: Entire prize structure can be customized with real prizes.

Branding: Logos and podiums. Branding of computer software may be available.

Modifiers: We can override which player is active in play.

Podiums Bases: On carpeted cases with graphics, truss/led bases, or multiquad bases with graphics.

Video Screens: 42" LCD, 60" LCD, short throw video screen, hi res video curtain.

Picture Above: Star Power when used as part of "Game Show Give Away" show, large podiums, 42" monitor in display wall. (Lights with "100" and "Joker" are part of another game.) Set design is very flexible with the game.

What We Provide (varies by production level)

Producer's Note: This game show which is sometimes used as an element of our *Gigantic Game Show Give Away*, makes a great promotion on its own for casinos, event marketing, and promotions. It excites crowds and keeps their attention. Rotate this game throughout the promotional day for maximum effect. This is also a simpler version of our *"Promotion Commotion" / "Eyes on The Prize"* game show which involves more people.
